

[Metallic Cabinet Door Organizer]

Abstract

A metallic cabinet door organizer providing a convenient, functional, space saving, efficient, lightweight, concealed, and inexpensive method for magnetically mounting printed material and other small household/office items to the inside panel of cabinet doors, which would otherwise be wasted space. The metallic cabinet door organizer comprises a flat metal plate, an optional adhesive agent layer for adhering the metal plate to the inside of a cabinet door, an optional color and/or other coating/sealant applied to the metal plate and optional anchoring hardware for anchoring the metal plate to the inside of a cabinet door. The metal plate, adhesive layer, color and/or other coating/sealant may be secured inside or outside of the inner rabbet of a cabinet door's outer frame.
